-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Priority*

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Araoka.

Araoka teaches a collapsible lens barrel comprising: a first holding frame 20 for holding a first lens group 21; a second holding frame for holding a second lens group 31 that is disposed on an image plane side with respect to the first lens group; an actuator (motor) for moving the second holding frame in an optical axis direction; and a tubular cam frame 60 comprising a plurality of cam grooves that are formed at substantially equal intervals around a circumferential direction for moving the first holding frame in the optical axis direction; wherein the actuator is attached to a portion in the cam frame 60e where the cam grooves are not formed. The applicant is directed to review figure 3 as well as col 9, lines 6-11.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Yugi et al (JP10-197775). Yugi teaches a collapsible lens barrel comprising: a first holding frame 16 for holding a first lens group ; a second holding frame 7 for holding a second lens group that is disposed on an image plane side with respect to the first lens group; an actuator 17/22 for moving the second holding frame in an optical axis direction; and a tubular cam frame 6 comprising a plurality of cam grooves that are formed at substantially equal intervals around a circumferential direction for moving the first holding frame in the optical axis direction; wherein the actuator is attached to a portion in the cam frame 60e where the cam grooves are not formed. The applicant is directed to review figure 5.
